❖ Career Objective

Detail-oriented and enthusiastic Manual Functional Tester with 3 years of experience in performing manual testing, Cross-Browser Testing, and Neural Filter Testing in Photoshop. Proficient in STLC, Bug Reporting, Regression Testing, and Performance Assessment for creative software applications. And 2 years of experience of Web designing. I am currently transitioning to Automation Testing by learning Java and Selenium WebDriver to improve test efficiency and software quality. I am eager to leverage my skills in automation frameworks to contribute to enhanced testing processes and drive continuous improvement.

❖ Skills

- **Testing Tools:** Selenium WebDriver, TestNG, JUnit
- **Languages:** Java, SQL
- **Automation Frameworks:** Page Object Model (POM)
- **Version Control:** Git
- **Bug Tracking:** JIRA
- **Testing Types:** Functional Testing, Regression Testing, Ad-Hoc Testing, API Testing
- **Other Tools:** Maven, Eclipse, IntelliJ IDEA
- **Other Skills:** Cross Browser, STLC, Bug Reporting, Test Case Writing, TestRail, Photoshop

❖ Professional Experience

Manual Functional Tester

Qualitest / Noida| Feb 2022 - Present

- Test web and desktop applications (e.g., Neural Filters in Photoshop, Sharesheet Example) on daily release builds.
- Execute 100+ test cases daily, ensuring software functionality and quality.
- Report bugs in JIRA with detailed steps and collaborate with developers for issue resolution.
- Perform regression and ad-hoc testing to ensure stability and identify potential issues.
- Participate in daily scrum meetings and work effectively in an Agile environment.

Web Designer

Acwits Solution LLP/ Noida| Oct 2019 – Jan 2022

- Designed and developed clean, responsive static websites that met client needs and improved online presence.

- Worked closely with clients to understand their goals and create visually appealing website layouts.
- Used HTML, CSS, and JavaScript to build user-friendly websites with smooth navigation.
- Ensured websites were optimized for fast loading, mobile-friendly, and easy to update.

❖ Education

- **MCA**

Manipal University Jaipur | 2023

- **BA(Hons)Hindi**

Shyam Lal College (DU) | 2020

❖ Projects (Relevant to Automation Testing)

1. Selenium for Beginners - Exception Handling & Waits

- Developed a Selenium project to handle and troubleshoot five common exceptions: *NoSuchElementException*, *TimeoutException*, *ElementNotInteractableException*, *InvalidElementStateException*, and *StaleElementReferenceException*.
- Identified causes of each exception and implemented solutions to resolve issues during test execution.
- Used `ImplicitWait` and `ExplicitWait` to manage dynamic web elements and resolve timing issues in tests.
- Demonstrated how to handle exceptions effectively and improve test stability with wait strategies.

2. Login Test Suites - Java with Selenium

- Developed a test automation suite using Java and Selenium to validate login functionality.
- Created Positive Login Test and Negative Login Test classes to test correct and incorrect username/password scenarios.
- Implemented 3 types of login scenarios: correct credentials, incorrect username, and incorrect password.
- Used Automation Test to validate random YouTube functionality and ensure smooth integration.
